Monroe County recently passed a plan that puts our community at risk of even higher property taxes and inadequate funding for our schools. The F.A.I.R. plan takes funding from the sales tax, originally designated to education and redirects it towards Medicaid spending. This devastating plan will be most damaging to Greece, where property taxes will need to be raised by 6.01% to fill this gap.

***Join County Legislature Dick Beebe to learn
more about this issue and help find a solution.***
